PHILOSOPHICAL MAGAZINE A, 1996, VOL. 74, NO. 6, 1467–1470

SUBJECT INDEX

Vol. 74

PAGE

Accommodation twins in BaNiMn oxides . . . 1351
Al rich TiAl, deformation mode of . . . 251
Al, deformed recrystallization in . . . 1047
Al, Ni doped, amorphous phase in . . . 593
ALCHEMI, application to TiAl alloys . . . 57, 77
AlCoCu(Si) and AlNiCo, order and disorder in . . . 45
AlLiCu quasicrystals, phase transition in . . . 629
AlN–SiC interfaces . . . 777
AlNiCo and AlCoCu(Si), order and disorder in . . . 45
AlNiCo decagonal quasicrystals . . . 697
Al–Pd decagonal quasicrystal . . . 299
AlPdMn system, quasicrystalline phase in . . . 939
Alumina ceramics, cracks in . . . 1245
Alumina, fracture in . . . 1253
Alumina, polycrystalline, cracks in . . . 1265
Aluminides, transition metal, stability in . . . 1385
Amorphous carbon films, nanoindentation of . . . 1143
Andrade creep, criticality in . . . 1041
Antisite and phase structure in TiAl . . . 791

B_2O_3, liquid, in deformed Cu . . . 531
BaNiMn oxides, accomodation twins in . . . 1351
Bcc alloys, irradiated, segregation in . . . 709
Bcc metals, formation of slip channels in . . . 287
$Bi_2Sr_2CaCu_2O_x$, structural modulation in . . . 307
Bicrystal, dislocation in . . . 919
Binary alloys, nanocrystalline-to-glass transition in . . . 103
Brittle solids, fracture and deformation of . . . 1299

Carbon films, amorphous, mechanical properties of . . . 1143
Carbon nanotubules, chirality of . . . 723
Carbon, glassy, mechanical properties of . . . 1085
Carbon–epoxy composites, mechanical properties of . . . 1131
Ceramics, indentations in . . . 1107
Chirality of carbon nanotubules . . . 723
Cleavage and dislocation emission . . . 983
Cluster description of structure changes in $Bi_2Sr_2CaCu_2O_x$ . . . 307
Coatings, electroplated, Vickers hardness of . . . 1171
Convergent-beam lattice parameter determination . . . 23
Coulomb repulsions on silicon oxide surfaces . . . 1339
Cr_2O_3, use of for polishing Si_3N_4 . . . 1003
Crack front, dislocation rings on . . . 419
Cracks in alumina ceramics . . . 1245
Cracks in III–V epilayers grown on InP . . . 383
Cracks in polycrystalline alumina . . . 1265
Creep, Andrade, criticality in . . . 1040
CSiH systems, potentials for . . . 1439
Cu substrates, a-Fe films on . . . 317
Cu, deformed, liquid B_2O_3 in . . . 531
Cu, elastic viscoplastic constitutive equations for . . . 359
CuAsSe, glassy and polycrystalline forms of . . . 281

Decagonal quasicrystal of AlPd 299
Decagonal quasicrystals, indexing of 821, 841
Defect cascades in YBCO 617
Defect ratio in dislocation hysteresis 137
Defects, new, in diamond 685
Deformation and fracture in lamellar TiAl 569
Deformation structure in W 1195
Deformation, inhomogeneous, of polycrystals 957
Deformed Si_3Ni_4 microstructures 215
Depth-sensing indentation instruments 1129
Diacetylenes, monomer–polymer transformation in 195
Diamond, new defects in 685
Diffusion, vacancy mechanism of 543
Dislocation and cleavage emission 983
Dislocation hysteresis, models of 137
Dislocation in a bicrystal 919
Dislocation networks in SC16 superalloy 229
Dislocation properties of silicon 1367
Dislocation rings on a crack front 419
Dislocation structure and properties of FeZn 509
Dislocations in TiAl with Nb and Cr additions 337
Dislocations in ZnSe 477
Disorder, partial, in FeZn 525

Elastic viscoplastic constitutive equations for Cu 359
Elastically anisotropic angularly inhomogeneous media 861
Elastoviscoplastic materials, indentation in 1235
Electroplated coatings, Vickers hardness of 1171

Fe films, amorphous, on Cu substrates 317
Fe_3Al, superdislocations in 665
FeZn, mechanical properties in. 509
FeZn, partial disordering 525
Fracture and deformation of brittle solids 1299
Fracture in alumina 1253
Friction force images on NaF surfaces 1329

GaAs–AlAs heterostructures, indentation in 1185
Glass, nanoindentation of 1097
Glass–epoxy composites, mechanical properties of 1131
Glassy and polycrystalline forms of CuAsSe 281
Glassy carbon, mechanical properties of. 1085
Grain boundaries in NiAl 641
Grain boundary strength in Mo 465
Growth and nucleation between two interfaces 965

Heterostructures of GaAs–AlAs, indentation in 1185

Incommensurate NdCaCoO compounds. 1399
Indentation in elastoviscoplastic materials 1235
Indentation instruments, depth-sensing 1129
Indentation method 1061
Indentation processes, temperature effects in 1273
Indentations in ceramics 1107
Indented MgO, cathodoluminescence from 1311
Inhomogeneous elastically anisotropic media 861
InP, cracks in III–V epilayers grown on 383
Interfacial structure in TiB_2–$Ti_{0.9}W_{0.1}C$–SiC 269

Intermetallic compounds, sublattice occupancy in 741

Kear–Wilsdorf locks, jogs and tubes in Ni_3Al 1019

Lamellar boundaries in twinned TiAl 451
$LaNi_5$, tin alloying in 15
Lattice statics in a semi-infinite crystal 431
Lattice parameters, use of convergent-beams for 23
Liquids at solid–liquid interfaces 761
Long-range order in solidification model 3

Metallic contact induced microdeformation 1319
Metals, indented, plastic strain in 1213
Metals, point defects in 811
Mg_2Si particles in Mg composites 887
MgO, indented, cathodoluminescence from 1311
Mg, tilt grain boundaries in 407
Microdeformation induced by metallic contacts 1319
Misfit dislocations in ZnTe/GaSb 553
Mo, grain boundary strength in 467
Monomer–polymer transformation in diacetylenes 195

NaF surfaces, friction force images on 1329
Nanocrystalline-to-glass transition in binary alloys 103
Nanoindentation of glass 1097
Nanoindentation studies using AFM 1117
Nanostructures, semiconductor, structure of 1421
NbTi, tunnel systems in 495
NdCaCoO compounds, incommensurate 1399
Ni doped Al, amorphous phase in 593
Ni_3Al, Kear–Wilsdorf locks, jogs and tubes in 1019
Ni_3Al, ordered, superdislocations in 113
NiAl, grain boundaries in 641
Nucleation and growth between two interfaces 965
Nucleation in phase transformations 1407

Order in liquids at solid–liquid interfaces 761
Organic polymers, microhardness of 1159
Oxygenated YBCO films, microstructure of 151

Particle impact phenomena in silicon nitride 1287
Phase transformations, nucleation in 1407
Picoindentation studies using AFM 1117
Plastic strain in indented metals 1213
Point defects in metals 811
Polycrystals, inhomogeneous deformation of 957
Polymers, organic, microhardness of 1159

Quasicrystaline phase in AlPdMn 939
Quasicrystalline AlLiCu, phase transition in 629
Quasicrystalline AlNiCo 697
Quasicrystals, decagonal, indexing of 821, 841

Recrystallization in deformed Al 1047

Sapphire, surface deformation of 171
SC16 superalloy, dislocation networks in 229
Segregation in irradiated bcc alloys 709

Semi-infinite crystal, lattice statics in 431
Semiconductor nanostructures, structure of 1421
Semiconductor–semimetal interfaces, reactions at. 907
Semimetal–semiconductor interfaces, reactions at. 907
Si surfaces and potentials for CSiH systems 1439
Si, microindentation of 1073
Si_3N_4 polishing of with Cr_2O_3 1003
Si_3N_4 microstructures, deformed 215
SiC–AlN interfaces 777
Silicon nitride, particle impact phenomena in 1287
Silicon oxide surfaces, Coulomb repulsions on 1339
Silicon, dislocations and stacking faults in 1367
Slip channels in bcc metals, formation of 287
Solidification, model of 3
Stobbs, Michael, obituary 1
Sublattice occupancy in intermetallic compounds. 741
Superdislocations in Fe_3Al. 665
Superdislocations in ordered Ni_3Al 113
Superplasticity in Mg composites containing Mg_2Si 887
Surface deformation of sapphire 171
Surface forces, use of to study indentation 1061

Temperature effects in indentation processes. 1273
TiAl alloys, application of ALCHEMI to 57, 77
TiAl with Nb and Cr, dislocations in 337
TiAl, Al rich, deformation mode of. 251
TiAl, lamellar, deformation and fracture in 569
TiAl, phase and antisite structure in 791
TiAl–TiAl lamellar boundaries in twinned TiAl 451
TiB_2–$Ti_{0.9}W_{0.1}C$–SiC composite 269
Tilt grain boundaries in MgO 407
Tin alloying in $LaNi_5$ 15
Transition metal aluminides, stability in. 1385
Tunnel systems in NbTi 495

Ultra-microindentation of Si 1073

Vacancy mechanism of diffusion 543

W, microindentations in 1195

YBCO films, microstructure of. 151
YBCO, defect cascades in 617

ZnSe, dislocations in 477
ZnTe/GaSb, misfit dislocations in 553
